Product Description**Customized Small Electric Utility Vehicles ,2 Person Electric Passenger Bus**

Electric cars offer advantages of both an economic and technical nature. Running costs are lower as, unlike combustion vehicles, there aren't any parts subject to wear, and the motor works in a cleaner, more simple manner than traditional engines.

But there are also other benefits, such as the possibility to move freely even in areas with traffic limitations because these vehicles are non-polluting. This is a huge advantage nowadays, given the ever increasing traffic bans. Consumption is very low.
